Portfolio: [Portfolio](#)

SUMMARY

Enthusiastic Cybersecurity undergraduate with hands-on experience in network security, digital forensics, penetration testing, and Python development. Skilled in security analysis using industry-standard tools including Kali Linux, Wireshark, Nmap, Burp Suite, and Metasploit. Passionate about solving real-world security challenges through projects and Capture The Flag competitions while continuously expanding technical expertise. Eager to contribute to a cybersecurity-focused organization with a strong learning mindset and analytical approach.

EDUCATION

Sri Ramakrishna College of Arts and Science (SRCAS), Coimbatore

Bachelor of Science in Computer Science with Cyber Security, CGPA: 7.1

2024 – 2027

Murugu Matric Higher Secondary School, Tiruppur

XII Higher Secondary (State Board), 88%

2024

Malayapalayam Government Higher Secondary School, Erode

X Secondary School (State Board), 60.2%

2022

EXPERIENCE

Cybersecurity Intern

May 2026 – June 2026

PREFENZO Technologies

Coimbatore

- Assisted in strengthening network security and defensive architecture initiatives.
- Performed packet analysis and monitored network traffic to identify potential vulnerabilities.
- Supported vulnerability assessment activities using industry-standard cybersecurity tools.
- Collaborated with security professionals to document findings and prepare security reports.
- Assisted in implementing security best practices on Linux-based systems.
- Gained practical exposure to firewall configuration and intrusion detection concepts.
- Supported secure application deployment and system hardening activities.
- Contributed to maintaining security documentation and operational procedures.
- Successfully completed one cybersecurity internship covering multiple defensive security domains.
- Contributed to vulnerability identification and security assessment activities.
- Strengthened practical knowledge of enterprise security operations and Linux administration.
- Worked collaboratively with experienced security professionals in a production environment.

Project Contributor

2025 – Present

Academic Cybersecurity Projects

- Developed PyroWall, a Python-based stateful firewall using socket programming and TCP/IP networking.
- Built Phalanx Check, a phishing simulation platform with ethical safeguards and audit logging.
- Designed Chainraptor, an AI-assisted penetration testing framework integrating LLM capabilities.
- Created IronLog, a file integrity monitoring solution using eBPF, blockchain, and cryptographic verification.
- Applied Python programming to automate cybersecurity workflows.
- Implemented secure coding practices across multiple security-focused applications.
- Performed research on offensive and defensive cybersecurity methodologies.
- Practiced real-world attack simulation within ethical security boundaries.
- Completed four end-to-end cybersecurity projects demonstrating practical technical skills.
- Applied multiple security technologies including AI, blockchain, eBPF, networking, and cryptography.
- Built reusable security tools supporting defensive monitoring and ethical testing.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C, C++, Go

Cybersecurity: Network Security & Defence, Digital Forensics, Packet Analysis, Stateful Firewalls, Penetration Testing, Cryptography, Social Engineering Defence, Phishing Simulation, Incident Response, Endpoint Security, Information Security, Threat Hunting

Operating Systems: Kali Linux, Arch Linux, Windows, UKI

Tools & Platforms: Wireshark, Metasploit Framework, Git & GitHub, John the Ripper, Wazuh Lab, Hydra, Burp Suite, Steghide, Nmap, OWASP ZAP

Design & Media: Adobe Photoshop, Adobe Illustrator

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Ethical Mindset, Capture the Flag (CTF) Participation

CERTIFICATIONS

Google Career Certificate – Foundations of Cybersecurity (May 2026)

Google Career Certificate – Play It Safe: Manage Security Risks (May 2026)

Google Career Certificate – Connect and Protect: Networks and Network Security (May 2026)

Security Blue Team – Introduction to PowerShell (June 2025)

Security Blue Team – Introduction to Penetration Testing (May 2025)

AWARDS & ACCOMPLISHMENTS

Completed practical coursework in network security, ethical hacking, and digital forensics. Active participant in international Capture the Flag (CTF) competitions including UMass CTF, Blue Hens CTF, and UDCTF. Experience creating UI mock-ups and visual designs using Adobe Photoshop and Illustrator.
